

CERTIFICATIONS

Babcock Laboratories has been certified—originally by the California Department of Public Health (CDPH)—since 1928 for the analysis of drinking water for public health protection. Our laboratory was one of the first in the State of California to receive this certification.

Since that initial certification, Babcock’s accreditation has never lapsed. Our laboratory has always held accreditation through California’s Environmental Laboratory Accreditation Program (CA ELAP) and operated at TNI’s national standards, despite the State’s recent withdrawal from TNI’s National Environmental Laboratory Accreditation Program (NELAP). Babcock Labs is now NELAP

accredited through the State of Oregon (ORELAP). Today, our certification includes not only the microbiology of drinking water and wastewater, but also the complete inorganic and organic analysis of drinking water, wastewater, groundwater, soils and hazardous materials.

In 2012, Babcock Labs received official notification of accreditation through the American Association for Laboratory Accreditation (A2LA) for the bacteriological testing of beverage and food products.

Babcock Labs is approved for the testing of drinking water, wastewater, groundwater, soils and hazardous waste in the following fields:

✓Bacteriology

✓Inorganic Chemistry

✓Toxic Chemical
Elements

✓Extraction Tests

✓Organic Chemistry

ACIL RECOGNITION

The laboratory is a seven time recipient of the prestigious Seal of Excellence Award from ACIL! ESB is one of only five labs among some 800 in California to receive this distinction.

For the complete list of awards won by Babcock Laboratories, please visit our [website](#). ACIL has since discontinued the the Seal of Excellence program, concluding the lab's participation in the program.

DIAMOND QUALITY AWARD

Babcock Laboratories regularly tracks its data and customer service quality. It consistently receives top scores in data integrity, as determined by its Proficiency Testing scores, and in customer service, as determined by its client satisfaction survey.
